

Year 4 Science morning

On Tuesday morning, 6 year four children arrived at Black Firs Primary School to take part in science activities, led by scientists from Astra Zeneca.

The children learnt how to extract D.N.A. from a banana and were told about the importance of D.N.A. in all living things.

We also explored how different liquids mix or don't mix. Using this knowledge, we were shown how to make a lava lamp.

All of the children enjoyed the morning and were a delight to work with.

A huge thank you to Astra Zeneca and Black Firs for a great morning!

On Tuesday, six year 4 children went to Black Firs Primary School to take part in a Science Morning led by Astra Zeneca. They learnt how to extract D.N.A. and create a lava lamp. What a great morning!
